Dust Control

Controlling Dust Start to Finish

When it comes to dust control, it's important to look at the full picture. Minimising dust created in the first place reduces the amount of dust to capture, which reduces the amount of dust to dispose of.

Note: For all compliance and safety advice, consult your local Worksafe group.

1. Minimise Dust Created

- Use high quality tools and blades / discs that give cleaner cuts
- Use track saws to prevent the need to re-cut and ensure pure, straight cuts
- Use on-tool extraction to suck dust directly from the surface

2. Efficient Dust Capture & Filtration

- Ensure your dust extractor hose diameter matches the type of dust you're extracting for smooth flow
- Maintain your suction power by regularly replacing your filter (DO NOT bang it on a hard surface to clean it as it can destroy the filter fibres)
- Use dust extractors that are proven to be safe for hazardous construction dusts

The Festool M Class extractors have been independently tested and operate well below exposure limits. Watch how the testing was done at www.festool.com.au/knowledge/dust-safety.

3. Safe Removal of Dust

- Use bags that can be easily locked off and sealed when removing
- Bag your old filters when changing them to avoid exposure
- Use tear-resistant bags for safe transportation of dust off-site

Visit festool.com.au to see how the Festool system helps you control dust, start to finish.

FESTOOL: NUMBER 1 IN DUST EXTRACTION MANAGEMENT FOR CONSTRUCTION DUST

Advanced electronics for dust monitoring and flow sensors for full protection.

Integrated Hose garage with AntiStatic Hose for no shocks.

L, M, H, HEPA Class filters to cover all applications.

Disposable Sealable Waste Bags for different construction waste for easy and safe disposal.

Cyclone Pre Separator

The CT Separator is an anti-static three-step filtration system that separates and collects large debris and coarse dust before it reaches the mobile dust extractor.

A consistently high suction power as a result of reducing the load on the main filter means that up to 80% of mineral dust and up to 95% of coarse particles.

18V CORDLESS ANGLE GRINDER

WORLD FIRST

Sealed Brushless Motor

Encapsulated motor and potted electronics are safely protected from dust.

Impressively ergonomic

All features of the design are aimed at maximum ease of use for cut-offs. The motor is decoupled from the housing, for extremely smooth running and low vibration.

Variable Speed Control

Fully variable speed control from 4500 to 8500 rpm.

18V CONCRETE DIAMOND CUTTER

3 YEAR WARRANTY ON TOOLS, BATTERIES & CHARGERS

Cut close to edges and walls

Dust extraction attachment can be opened easily at the front for work along walls and edges.

Bluetooth connectivity

Bluetooth® battery pack starts the connected dust extractor automatically.

Clean and healthy

The dust extraction attachment conveys ≥ 95% of the dust directly to the connected dust extractor.

Construction Dust

Safe Cutting of Construction Materials

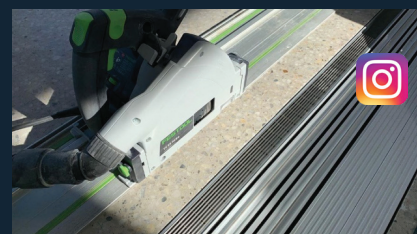

Did you know Festool invented the track saw way back in the 1960s? The years of continuous development since have resulted in today's machines, which are trusted by thousands of professional tradespeople for their performance and safety. This is particularly important when it comes to cutting hazardous construction materials.

Festool track saws:

- Slice fibre cement sheet products, concrete, natural stone, plus all common timbers
- Minimise dust created with perfect first-time cuts, every time
- Pair with Festool's high-performance dust extractors
- Thoroughly extract dust directly from the source
- Allow super quick blade changes for different materials

Polished concrete specialist **Asaynammour** relies on the plunge saw's precision and dust extraction performance for his various construction projects.

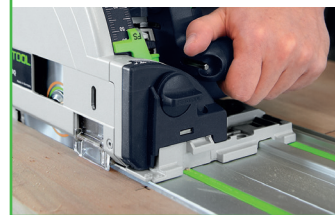

COMPLIANCE: CUT CEMENT SHEET DUST FREE

99.5% Dust Free Compressed Sheet and Fibre Cement Sheet Products.

Add the dust cover to ensure all dust is captured when cutting Construction products.

99.5% Dust Extraction and 100% cut accuracy on the FS Guide Rail System for NO rework.

THE MOST UNIVERSAL CIRCULAR SAW ON THE MARKET

Use freehand for general carpentry.

Use on a cross cut rail for repetitive angles and bevels.

Use on a guide rail for sheet cutting.

Redefining the Construction Saw

The Festool cordless construction saw challenges the notion of always needing a drop saw on-site. From docking to plumb to cross cuts, this cordless weapon is up to the task wherever you're working.

- Unique FSK cross cut rail attaches directly to saw
- Rip and cross cut up to 55mm depth
- 45-degree bevel cut up to 42mm depth
- Switch between standard and plunge cut modes
- Compatible with dust extractors and bags

"I think it's awesome. Take it in one box. Cut a whole job, no fuss, no mess."
Jason, MacKintosh Floor Sanding

WATCH: The Oz Tool Talk boys put the HKC 55 through its paces in their YouTube review

Kapexcellence

The high-performance 120mm Kapex drop saw is Festool royalty. Renowned for its laser precision, clever design, speedy blade changes and ease of transport, the KS 120 is a staple in many professional tradies' arsenal.

"The mighty Kapex 120 from Festool. Precision sliding compound mitre saw. Cutting these post moulds has never been easier. With the precision laser guide and the bevel scribing tool, these corners are bang on every time."

Ben, Johnson Building & Design

"This is our company's workhorse. A precise saw that cuts clean, sharp and accurate every time. Foldable, so we can chuck them in and out of our vans and utes easily and quickly. Wheels on the back makes for ease of use when on the work site, from room to room and changing location."

Mark, Kustom Timber

SLIDE COMPOUND MITRE SAWS

KS 120: Dual Line Laser either side of the blade for 100% accuracy.
